

**Package Name:** Tbl2tex

**Author:** IHS EViews

**Date:** 2010/12/17

**Add-in Type:** Table

**Default Proc Name:** tbl2tex

**Default Menu Text:** Make Table to TEX

**Interface:** Dialog and command line

**Description:** This add-in allows you to convert a table in EViews into LaTeX format (i.e. \*.tex). Due to some generic differences between EViews and LaTeX, fancy styles such as color/characters and the line between header and content cannot be created.

**Command line:**

*Syntax:* tbl2tex(options)

*Options:*

	Explanation
name	Name of .tex file (e.g. myname.tex).
path	The full path of the directory to save .tex file.
